CURRICULUM VITAE

Michele Savarese

Laravel Full Stack Developer

I build business applications and e-commerce platforms with Laravel, working across architecture, back-end, interfaces and Docker environments.

Technical skills

Agile, Angular, Atomic Design, AWS EC2, Bash, Bootstrap 5, CSS3, Docker, Font Awesome, Git, HTML5, Java, JavaScript, Laravel, Linux, Livewire, MySQL, Networking, Nginx, Nginx Proxy Manager, OpenAI Codex, PHP, React, Scrum, Hardware support, Visual Studio Code, Windows

Selected projects

Portfolio

Full-stack portfolio built with Laravel 13, Docker, and Atomic Design. It combines multilingual content, administration, accessibility, SEO, automated tests, and deployment and monitoring tools; I developed both its front end and back end.

Atomic Design AWS EC2 Bootstrap 5 Docker Font Awesome

Radio Platform Management System

Dockerized radio platform built with Laravel 11 and React. Laravel handles the back end, while React manages the blog forms and podcast creation. I also implemented playlists, favorite content, comments, and reactions.

Bootstrap 5 Docker Font Awesome Git Laravel

Napoli Liberazione

Platform built with Laravel 11, React, and Docker. I worked on the front end and parts of the back end, including workflows dedicated to subscription management.

Docker Git Laravel PHP React

Theater E-commerce Management

Laravel 11 e-commerce and management platform in Docker for a theater company. It manages events and text, audio, and video attachments, customer requests, Nexi payments after approval, minimum ticket quantities, and email summaries and reminders. Tickets are generated with QR codes and can be validated through the platform.

Bootstrap 5 Docker Font Awesome Git Laravel

Boat Tour E-commerce

E-commerce and management system for boat tours built with Laravel, MySQL, and Docker. I developed front-end and back-end features using a GitLab workflow for version control and collaboration.

Docker Git Laravel PHP MySQL

Minimarket Management System

Laravel e-commerce and management platform for a minimarket. It combines online payments, operational management, and artificial intelligence features that support the sales process.

Laravel PHP MySQL OpenAI Codex

ERP for a Cultural Association

Internal ERP for a cultural association, developed with a colleague. I worked on the integration between the Laravel back end, MySQL database, and Angular front end.

Laravel PHP MySQL Angular

Deli Management System

Management system for a deli menu built with Laravel 12.4. I designed the application and database, developed the front end and back end, and containerized the project with Docker.

Docker Laravel HTML5 CSS3 JavaScript
